

Seat Tab Extension YFZ450R

(Yamaha YFZ450r/x 2010-2018)

Kit includes

1x Extension Plate

1x 6mm allen bolt

Tools needed

Drill

9/32" drill bit

4mm Allen wrench

Pencil

Scissors

Installation

1. Cut out included templet (at end of the page) to use for making the require hole to be drilled.
2. Place the extension plate under the existing front tab and all the way forward. (figure 1)
3. Use templet to mark hole to be drilled. (in the following figures I used another extension plate instead of the templet Figure 2)
4. Drill 9/32" hole, do not drill too deep as the gas tank is under this!! We recommend you remove the plastic from the ATV for drilling. (this is a little larger than the screw to allow some misalignment)
5. Apply thread locker and install allen bolt.
